

Dragon – How to Copy a Step-by-Step Command

Tip ► You have created a command to queue up an Epic order panel, you can easily duplicate the command and edit the step to bring up a different order panel

Note ► Dragon Step by Step Commands allow users to create steps to automate tasks that normally require clicking.

1. Click Dragon Menu  and select **Manage Step by Step Commands** or say, “**Manage Commands**”.
The Manage Step by Step Commands dialog box will open.

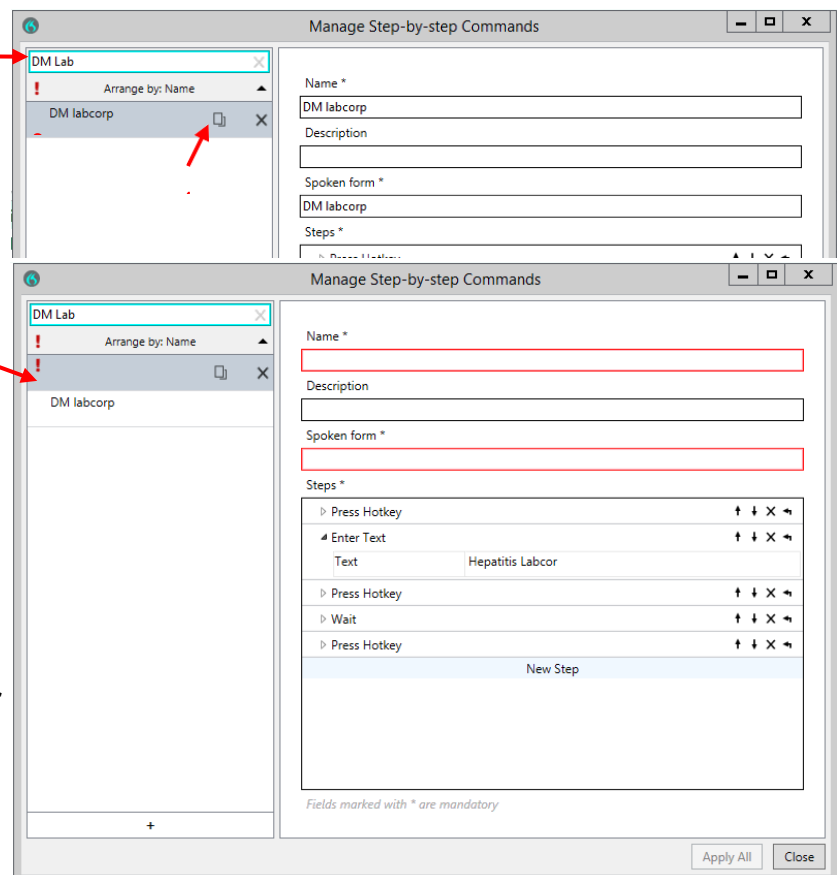

2. Search for the command
you would like to copy.

3. Click on the command to copy.
This will show the copy icon

4. Select  icon to copy the steps
into a new command.

*A command was successfully copied
If you see a new blank command and
the name field will be outlined in red*

5. Enter the command name
6. The spoken form field updates.
7. Edit the necessary steps for your
Command.
 - a. **For orders/order panels, you
Simply need to up date the enter
Text step and update the new
Order panel name from Epic**
8. Click **Apply All** to save.

The dialog box is titled "Manage Step-by-step Commands". It has a list of commands on the left and a form on the right. The list shows "DM Lab" and "DM labcorp". The form has fields for "Name", "Description", "Spoken form", and "Steps". The "Steps" field is a list of steps with buttons to add, edit, or delete them. The bottom screenshot shows a new blank command added to the list, with the "Name" field outlined in red.
